

# Haven't heard of the LRDP?

*That's because the filthy rich Regents and their diplomatic goon George W. Blumenthal don't want you to know about their plans to:*

- Expand corporate-funded research and prestige-generating graduate programs at the expense of other academic interests.
- Destroy 120 acres of beautiful forest in Upper Campus, seriously impacting rare and endangered species.
- Trade quality of education for increasing quantity of students.
- Carelessly gentrify and overpopulate Santa Cruz with a 4,500 enrollment increase.
- Tell you that all this is being done in your best interest. Do you believe them?
